DUBLIN CASTLE,
5th October, 1908.

SIR,

I have to acknowledge the receipt of your letter of the 3rd instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Report of the Congested Districts Board for Ireland for the year ended the 31st March, 1908.

I am,

Sir,

Your obedient Servant,

(Signed), J. B. DOUGHERTY.

The Secretary,
Congested Districts Board,
Dublin.

CONGESTED DISTRICTS BOARD FOR IRELAND.

TO HIS EXCELLENCY JOHN CAMPBELL,
EARL OF ABERDEEN,

&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

We, the members of the Congested Districts Board for Ireland, beg leave to submit this Report of our proceedings during the financial year ended 31st March, 1908.

MONEYS FOR THE PURPOSES OF THE BOARD.

Our available funds in the past year amounted to £322,580 Income and Expenditure.
derived from the following sources:—

(a) *Fixed Income.*

	£
Interest on Church Surplus Grant,	41,250
Parliamentary Grant,	25,000
Ireland Development Grant,	20,000
Total,	<u>£86,250</u>

(b) *Fluctuating.*

	£
Repayment of Loans,	10,030
Interest on Stock, &c.,	429
Rents and repayments under various heads,	101,113
Cash from Land Commission on re-sale of estates,	73,840*
Loans by Board of Works for improvement of estates and other purposes,	39,000
Loan from Civil Contingencies Fund,	3,000
Total Receipts,	<u>£313,662</u>
Balance from last year,	8,918
Grand Total,	<u>£322,580</u>

The total expenditure as detailed in the Appendices to this Report was £314,462, which left a balance of £8,118 at the end of the year, including a balance of £4,129 to credit of the two Fishery Funds. The sum of £442 4s. 7d. in Guaranteed Land Stock was also available for general purposes, in addition to £5,000 Stock to credit of the Fishery Funds. A Table given at p. 53 shows, for each year since the formation of our Board, the gross receipts and expenditure, including all moneys which passed through our hands for the purchase of estates.

* *Note.*—Subject to a payment of £12,512 for the purchase of Stock to be lodged at the Land Commission, see Appendix I.

Advances for
Purchase of
Estates.

The following advance was made in cash to the Land Judge by the Land Commission under Section 77 of the Irish Land Act, 1903, in payment for an estate for which our offer had been accepted:—

	£
Estate of W. Rowland,	1,230

The advances which, during the past year, have been made under the 72nd Section of the Act of 1903, for the purchase of estates for which we had negotiated with the owners, outside the Land Judge's Court, and for the redemption of charges on estates, are as follows:—

	£	s.	d.
Anketell Jones (I),	8,700	0	0
Do., (II),	1,600	0	0
Dr. Healy (Clarendon),	12,500	0	0
S. M. Hussey,	11,002	0	0
Brownville,	1,535	0	0
T. J. Coreoran,	643	0	0
W. R. Beamish,	3,028	0	0
Rusheenamanagh,	2,646	0	0
R. G. Bird,	7,932	0	0

Allanson Winn,	22,058	0	0
W. R. Tredennick,	796	17	6
Miss S. Jackson,	2,991	0	0
T. Hazell,	1,545	0	0
M. Longfield,	1,400	0	0
E. A. Bellingham,	8,000	0	0
E. O'Connor,	2,700	0	0
K. A. Staples,	23,300	0	0
R. Vesey Stoney,	3,775	0	0
E. B. Meade,	2,160	0	0
P. R. Hale,	5,000	0	0
M. Morris,	6,500	0	0
	<u>£243,694</u>	<u>17</u>	<u>6</u>

The entire amount of Guaranteed Land Stock issued to us for Total the purchase of estates prior to the passing of the Act of 1903, Advances and for the redemption of charges upon these estates, in the several under Act of counties, has now been cancelled by the sale of holdings to the 1896. tenants, as follows:—

COUNTY.	Total Advances.	Amount Cancelled at 31st March, 1908.
	£ s. d.	£ s. d.
Donegal,	19,873 9 3	19,873 9 3
Galway,	31,031 9 10	31,031 9 10
Mayo,	348,761 17 1	348,761 17 1
Roscommon,	98,007 0 0	98,007 0 0
Sligo,	4,524 0 0	4,524 0 0
Total,	502,197 16 2	502,197 16 2

The amount advanced in cash by the Land Commission under Total the Irish Land Act, 1903, sec. 72 and 77, for the purchase of Advances estates for us in the several counties and the amounts written off under Act of our debt for these advances by the sale of holdings to the tenants 1903. were, on 31st March last, as follows:—

COUNTY.	Total Advances to 31st March, 1908.	Amount written off.	Balance due to Land Commission.
	£ s. d.	£ s. d.	£ s. d.
Donegal,	796 17 6	796 17 6	—
Sligo,	92,021 0 0	3,801 0 0	88,220 0 0
Mayo,	448,106 8 0	23,604 5 0	419,012 1 0
Roscommon,	356,330 13 4	5,656 13 4	351,254 0 0
Galway,	149,966 0 0	63,092 0 0	86,874 0 0
Kerry,	105,677 0 0	10,263 11 9	95,323 8 3
Cork,	12,360 0 0	—	12,360 0 0
Total,	1,165,337 16 10	102,004 7 7	1,063,333 9 3

In addition to the above sum of £102,004 7s. 7d., written off by re-sales, tenants had at 31st March last signed purchase-agreements for £225,893, which will be written off in due course.

OPERATIONS DURING THE YEAR 1907-1908.

Our operations fall under the following heads:—

- I. Improvement and enlargement of holdings and Migration;
- II. Sea Fisheries;
- III. Industries;
- IV. Engineering Works and Parish Committees;
- V. Miscellaneous.

I.—IMPROVEMENT and ENLARGEMENT of HOLDINGS and MIGRATION.

Purchase of
Estates.

Estates purchased since 17th September, 1907, the date of our last report:—

Estate.	County.	Area.		Purchase Price.
		Tenanted.	Untenanted.	
		Acres.	Acres.	£
William Rowland,	Mayo,	288	—	1,230
B. F. McDonnell,	Rosecommon,	—	160	2,100
Lord Westmesth,	"	295	838	12,000
Col. R. Irwin,	"	—	585	7,500
C. M. O'Connor,	"	—	367	6,000
Dr. Mangan,	Kerry,	453	—	900
Miss K. O'Donovan,	Cork,	1,124	—	2,400
M. Lydon,	Galway,	—	74	65
J. P. Maguire,	Rosecommon,	—	108	900
Capt. P. McDermott,	Sligo,	—	133	2,500
The O'Connor Don,	Rosecommon,	67	505	10,000
S. V. Coote,	"	—	220	3,000
Dr. R. Holmes,	"	—	163	3,200
P. Power,	Mayo,	3,142	1,988	12,000
	Totals,	5,376	5,182	77,375

In accordance with our usual practice we include in the above list all the properties for the purchase of which terms have been arranged up to the date of this report. Our purchases in each financial year since the passing of the Irish Land Act of 1903 have been as follow:—

	£
Amount of purchases in 1903-4,	183,896
" " 1904-5,	649,155
" " 1905-6,	347,975
" " 1906-7,	107,517
" " 1907-8,	134,703
Total,	£1,423,246

Although we were given by the Act of 1903 an additional income of £20,000, it was apparent that our funds were altogether insufficient to provide for more than a very small increase of our estates business, unless we abandoned our other schemes. Not only was a very considerable extension of this branch of our operations contemplated when the provisions of the Act were under discussion in Parliament, but this extension was clearly indicated in the Act itself. It was doubtless realised at that time that unless we were enabled to purchase and dispose of a large

amount of property in each year the relief of congestion by the enlargement of holdings could not make much progress in the present generation. The purchase of the £9,000,000 worth of untenanted land, estimated to be obtainable in the counties containing congested districts, by annual instalments of £100,000, which has been the annual average of our purchases since the Act of 1903 came into force, would occupy a period of about ninety years.

Purchase of
Estates.

The correspondence which took place between the Lords Commissioners of the Treasury and ourselves, through the Irish Government, has been printed in the first and eleventh Reports of the Royal Commission on Congestion, and shows that during the past two and a-half years we have been laying stress on the necessity of providing funds for the more rapid prosecution of our purchase work, while the Lords Commissioners of the Treasury have repeatedly insisted that no increase of our income could be made until the Royal Commission had issued their report. The final report of the Commission was published on the 23rd May last, and we have now to await the action to be taken upon the report by Parliament. Even if additional funds are provided in the current year a period of at least five years from the passing of the Land Act of 1903 must thus elapse before we shall be placed in a position to transact a fair volume of business under that Act. No less than one hundred estates, offered to us for purchase, were declined owing to the want of funds for improvement works, and the resettlement of a large number of holdings on these estates has thus been indefinitely postponed.

With regard to grass lands, we were aware that much of the available land was being disposed of under the operation of the Purchase Acts, and that there was consequently more urgency for the purchase of grass lands than for the purchase of poor tenanted estates. Having laid our views before the Irish Government, it was intimated to us in August, 1907, that the Lords Commissioners of the Treasury had consented to our proceeding cautiously with the purchase of £100,000 worth of grass lands in County Roscommon, and before the close of the financial year we had agreed to terms for about £33,000 worth of such lands.

With regard to the condition of our finances during the past year it will be seen from the correspondence above referred to that owing to unavoidable delays in completing the resale of the estates purchased before the passing of the Land Act of 1903, our receipts temporarily fell short of our estimate, and in order to carry on all our operations without a very serious check we applied in November last to the Lords Commissioners of the Treasury for a special loan of £25,000.

There are two funds from which we are permitted by the Purchase of Land Act, 1891, with the sanction of the Treasury, to obtain an advance, viz., the capital of the Church Surplus Grant or an advance from the Local Loans Funds secured on this capital. The amount of the advances from the Local Loans

Purchase of
Estates.

Fund on the 31st March last, so secured, was £143,282. We had also at that date guaranteed on this capital and on our income instalments, amounting to about £2,000 per annum, of tenant-purchasers who had bought holdings on our estates, and in respect of whose holdings guarantee deposits would otherwise have been required. We have also guarantee under Section 80-81 of the Land Act of 1903 the repayment of instalments amounting to about £18,000 per annum, but this liability cannot be regarded as a heavy one in view of the fact that we have never, as yet, been called upon to make good a default. In all these cases the holding is the primary security.

On the 12th February last, after we had much reduced our expenditure on estate improvements and on some other services, the Treasury made us an advance of £3,000 from the Civil Contingencies Fund, repayable early in the present year. The result of this difficulty in regard to funds was that in the year 1907-8 we expended on improvement works £96,235—instead of £110,000 estimated at the beginning of the year, and a reduction of £13,000 was made on the purchase of tenants' interests in holdings. Our resources being inadequate for the maintenance of our various schemes in the current year commencing 1st April, 1908, we have been able to provide only £33,000 for estate improvement works after borrowing £20,000 from the Board of Works, and have had to entirely suspend the Parish Committee Grants.

The following statement shows that since the Land Act of 1903 came into operation we have devoted a very substantial portion of our funds to our land operations, although as we have stated above, our income has been far below the sum required to give due effect to the provisions of that Act in regard to the needs of the Congested Districts:—

Year.	Total outlay on Estates, including cost of administration.	Total Receipts connected with Estates.	Net Annual Charge.
	£	£	£
1904-5	137,881	120,373	37,908
1905-6	236,865	270,397	25,263
1906-7	257,490	203,964	53,535
1907-8	231,837	180,490	55,327
Total in 4 years.	944,152	770,324	152,908

If the net expenditure on other schemes be deducted from £345,000, our total income for the four years, there remained £150,845, an average of £37,711 per annum, available from income to meet the outlay on estates. The rest of the money required had to be borrowed from the Board of Works, and we obtained from that department £106,000, of which £11,332 was repaid during the same period.

The finance of our estates operations since 1903 has been affected by an element which was not taken into account when the Land Act was before Parliament. We refer to the increase in the price we have had to pay for both tenanted and untenanted land, exclusive of the bonus of 12 per cent, paid to the vendors from the Land Purchase Aid Fund. Purchase of Estates.

The statement in Appendix No. XXIXA shows that, on the basis of Poor Law Valuation, we paid previous to the Act of 1903 for tenanted land 12½ years' purchase; for untenanted land 21 years' purchase; while under that Act, up to 31st March, 1908, the averages were—for tenanted land 18 years' purchase; for untenanted land 27½ years' purchase. The rise is thus shown to be between 5 and 6 years' purchase. If the comparison be made for tenanted land on the number of years' purchase of the rent, the result is—

Average previous to 1903, .	15½ years' purchase.
Average under Act of 1903, .	20 years' purchase.

The difference on this basis is 4½ years' purchase. It should, however, be borne in mind that a very large proportion of the holdings on estates purchased since 1903 were under second-term rents, and that such rentals must be regarded as far more secure and therefore better value in relation to the purchase price than the first-term rentals of estates purchased in the previous period.

We did not find it advisable to make a corresponding increase in the price at which we resold the improved holdings to the tenants, whose ability to repay their annuities is limited by the fair-rent value of the land, and consequently the percentage of loss in dealing with estates has risen from 6 to 15 per cent. on the purchase-money of the land.

On the 24th July last the following statement of the Board's financial position, in regard to estates purchased up to that date, was furnished to the Lords Commissioners of the Treasury:—

STATEMENT OF PROBABLE ASSETS AND LIABILITIES ON 31st MARCH, 1909.

I. *Liabilities.*

(a) Balance of Expenditure necessary to prepare for sale all estates (135) purchased under Act 1903 up to 31st March, 1908.	£
Total price £1,425,000, of which £328,000 has been sold	127,000
(b) Due to Board of Works on Loans for Improvement of Estates under all Acts. This includes £60,288 which is repayable by instalments during the next 20 years,	153,000
(c) Estimated loss at 15 per cent. on four Estates bought since 31st March, 1908, for £24,000,	3,600
Total,	£283,600

Purchase of
Estates.II. *Assets.*

(a) Enhanced value receivable from Land	£
Commission on 139 Estates,	148,000
(b) Value of Cattle on Grass Lands,	9,000
(c) Value of Holdings on old Estates not yet sold,	23,000
	<hr/>
	£180,000
Deficit,	£103,600
	<hr/>
	£283,600
	<hr/>

It is apparent from these figures that an increase of about £35,000 in our income during the past three years would have enabled us to deal with all the property we have purchased under the Act of 1903, and although, since the above statement was prepared, the estimates for the several unsold estates have been again revised, with the result that the probable net deficiency has been increased to £116,162, it is anticipated that the preparation for sale of these estates will occupy a further period of two years from 31st March, 1909, and the same addition to our income extended over this longer period, would more than suffice to cover the larger estimate of loss.

List of
Migrants.

In the Appendix will be found a list of tenants who have been migrated since the issue of our last report to new holdings formed on untenanted lands purchased by us and also a tabular statement showing the quantity of land added to small holdings on each estate. In connection with these Returns we desire again to emphasise the fact that the function of our Board is not to add to the number of landholders by providing new holdings for men who are not already landholders, but to enlarge the small holdings of existing occupiers. The necessity of purchasing grass lands for the purpose of raising small holdings to an economic standard has been recognised by many recent Land Acts, but the objection has been raised that the conversion of pasture lands into small holdings will seriously affect the cattle trade of this country. We are of opinion, however, that the appropriation of grass lands in the Congested Districts to this object will not have any appreciable effect in reducing the number of cattle bred or fed in Ireland, while it will give great assistance to a class of the community whose unfortunate position has so often called for the interference of the State.

Although the limited quantity of untenanted land we have been able to acquire has prevented our making any addition to a large proportion of the holdings which have passed through our hands and has greatly restricted the additions we have made in other cases, there is a considerable number of holdings which have been largely increased in value, and there can be no doubt that many of the occupiers who have been migrated to larger holdings would be greatly assisted both by instruction in better systems of farming and in the methods of organisation for the joint marketing of their produce. We are in communication

with the Department of Agriculture and with the Irish Agricultural Organisation Society in connection with these objects.

Cost of Migration.

In our fourteenth Annual Report, pages 19 and 20, we gave some details of the cost of settling migrants on new holdings, up to 31st March, 1905. During the past year we have settled 147 migrants on new holdings.

The gross area was	4,365 acres, an average of 30 acres.	The gross estimated fair rent was	£2,150, an average of £15.
The purchase price of the fee-simple of the 4,365 acres of untenanted land given to 147 migrants (including landlord and tenant-right interests) was,			£ 49,035
The total expenditure on buildings was,			14,354
The total expenditure on erection of boundary fences was,			1,939
The total expenditure on accommodation roads incidental to striping was,			1,367
The total expenditure on main drainage and other improvement works was,			1,477
Total cost of 147 new holdings,			£68,172

Deduct value of tenant-right interest of lands vacated by migrants, which was charged to the persons who got these vacated lands as additions to their holdings,		£3,855
Deduct sums paid in cash by herds and others for tenant-right interest of holdings given to them,	30	£3,885
Net cost of 147 new holdings given to migrants,		£64,287
The prices at which these 147 new holdings were sold to the migrants amounted to,		£50,568
The net loss incurred in settling the migrants was,		£13,719
and the average loss for settling each migrant was, therefore,		£93.

Since our land-purchase operations commenced we have expended £71,714 on drainage works up to 31st March, 1908, and under the present state of the law there are no means of providing compulsorily for the maintenance of these works, upon which such a large amount of public money has been expended. There has been no outlay on estate improvement works made by us which has been so directly beneficial to the landholders as the drainage works executed on the estates dealt with, but there is no doubt that a great many of these drains and rivers will silt up in places and become comparatively useless if no provision be made for maintaining them in an efficient condition. The Board's Chief Land Inspector drew attention to this matter in his evidence before the Arterial Drainage Commission and also before the Royal Commission on Congestion, and made certain recommendations, which it appears

Drainage Works.

to us would have a very beneficial effect. [*See Royal Commission, Vol. XI., p. 30. Drainage Commission Appendix, p. 384.*]

As further land legislation may be anticipated we desire to draw special attention to the urgent necessity of dealing with this important matter.

Dillon Estate.

Up to 31st March last we had re-sold holdings on the Dillon Estate up to a total value of £338,491, but holdings to a further value of £16,320 remained unsold. Of these, about £4,000 were in respect of ground rents in Ballaghaderreen, Charlestown, and Kilkelly, the re-sale of which had been postponed several years ago, as our tenants were not in occupation, until the scope of proposed legislation for the assistance of "town tenants" should be known. We are now making arrangements by which we anticipate that the ground rents will be sold during the current year, either for cash to the tenants or, where the parties come to terms between themselves, to the sub-tenant in occupation. Another step which will greatly facilitate the re-sale of the balance of this estate was the purchase in July, 1906, of the O'Grady leasehold on the Dillon Estate, difficulties as to title having caused a delay of more than three years. Arrangements are now being made for the re-sale of these lands, which comprise 3,266 acres. We also purchased the leasehold interest of Mrs. Dillon, comprising three town plots and 13½ acres of land in Ballaghaderreen.

Live Stock Insurance.

As explained at page 15 of our Report for the year ending 31st March, 1907, our scheme for the insurance of the live stock grazing on the lands temporarily held by us pending re-sale was in that year availed of by only a small proportion of the owners of the stock, who had the option of insuring or 'not insuring, but the fact that the owners who had insured were paid two-thirds of the value of their stock that died, while those who had not insured were not paid anything, led the owners of stock to see the advantage of insurance. As we were satisfied it was in the interest of the owners, nearly all of whom were small land-holders, that all their live stock would be insured, we declined to take any animals to graze on the lands in our hands during the year ending 31st March, 1908, unless the owners insured them, and this they all did without demur. The results have been very satisfactory both to the owners and to the Board. The small premium charged more than covered all the losses, and the owners whose animals died from any cause were paid two-thirds of the value declared when they were put upon the farm, and no charge was made for the grazing of the stock from the time of insurance to the date of death.

The scale of premiums adopted was shown at page 15 of our Sixteenth Report, and it is sufficient now to state that the rate is 2d. in the pound for six months on the declared value of the cattle, sheep, horses or mules at the time of insurance, except that horses are not insured on a higher value than £20. They can therefore insure an animal worth £5 for six months for 10d., and one worth £10 for 1s. 8d. This must be a great boon to poor people who have only a few head of cattle, and to whom the loss of one is such a serious matter.

For every shilling collected from the owners of the stock ^{Live Stock Insurance.} sixpence is contributed to the Insurance Fund from our grazing receipts, and the account at 31st March last, stood as follows:—

Credits:—

	£	s.	d.
Total receipts from premiums in 1907-8,	370	16	4
Add contributions to Fund from Board's Grazing Rents,	185	8	2
	£556	4	6

Debits:—

Total payments in discharge of claims under Policies,	271	2	4
Deficit on the previous year's account,	9	13	2
	£280	15	6

Surplus carried forward to next year's account, £275 9 0

The balance of £275 9s. has been placed to a reserve account with the view of accumulating a fund to meet exceptional losses that may occur in any future years. No charge has been made against the insurance account for the cost of working the scheme except the stamps on the receipts issued for the premiums paid.

We are much gratified at the success of this year's insurance scheme, and have no reason to anticipate that it will not be equally successful in future years, unless there should happen to be exceptional fatalities from special causes.

Pending the sale of the lands to the tenants we have let the ^{Sporting rights.} sporting rights on 20 estates during the past year, and have received the sum of £483 for rent. In most cases the tenant of the shooting has paid liberal "bird-money" to the tenants.

After the passing of the Irish Land Act of 1903, we were of ^{Evicted Tenants.} opinion that the reinstatement of tenants who had been evicted from estates before they came into our possession was a duty incumbent on the Estates Commissioners, who had powers to make grants for the assistance of such reinstated tenants from the Reserve Fund provided by the 43rd section of the Act. Our view was that our own position was merely that of a landlord who was about to sell his estate to the occupying tenants, and we expressed our willingness to place at the disposal of the Estates Commissioners any land which might be available for new holdings for evicted tenants, but we stated that we had no special funds out of which we could make grants-in-aid to these tenants.

The Evicted Tenants Act of 1907 has specially authorised the application of our funds to the making of such grants, but has not given us any additional funds for the purpose. We have, however, reinstated thirty-eight tenants on seven of our estates, and have voted £1,020 to assist these men in stocking and equipping their holdings.

Labourers
Cottages.

Since the Labourers Act of 1906 came into operation we have been served with a large number of notices by Rural District Councils for the purpose of taking portions of our estates for sites for labourers' cottages. Our view was that, while we were prepared to give sites for the erection of cottages for *bona-fide* labourers in lieu of unsuitable dwellings at present occupied by them upon or immediately adjacent to our estates, the land we had acquired was urgently needed by the small landholders for whom it was bought. We felt bound to object to the proposals made to place large numbers of cottages on lands required by us for the purpose of placing thereon working farmers who would employ little or no paid labour outside their own families, and accordingly we issued the following circular on the 15th May, 1907:—

*Applications for the Erection of Labourers' Cottages on
Estates Purchased by the Board.*

The Board desire to inform those interested in the erection of cottages under the Labourers Acts that they consider it their duty to object to the allocation of sites for labourers' cottages on estates purchased under the Acts relating to congestion in Ireland.

These Acts were passed for the purpose of enlarging holdings and for the migration of tenant-farmers, and a separate and distinct code of Acts exists for the benefit of labourers. The application of the Board's estates to the purposes of the Labourers Acts would be foreign to the purposes for which the Board was instituted and for which they purchase estates, and such application of their lands must, therefore, be opposed.

This intimation is given in order that districts may be saved the cost of an opposed scheme, and that Rural District Councils may be enabled to make such arrangements as will render opposition unnecessary.

The Board will, however, be prepared to consider applications from local authorities for sites in exceptional cases where the Board hold untenanted lands in the neighbourhood of towns or large villages.

II. SEA FISHERIES.

Fisheries.
General
Results.

The reports from the several stations which are given below show that the general results of the fisheries developed by our Board on the western and northern coasts of the congested districts were very satisfactory in the year ending 31st March last, the total earnings at the four principal fisheries having been £63,819, against an average of £58,000 in the past five years. These figures include, however, the receipts of certain English and Scottish boats that came for the County Donegal herring fishing.

The four fisheries now referred to are:—

(a.) The spring mackerel fishing on the Galway coast, including the Aran Islands. The earnings here were £6,218, which was near the average of the past three years (£6,400), but fell considerably short of the average of the five preceding years, which was £8,000.

(b.) The autumn mackerel fishing on the coasts of Galway and Mayo has been the most fluctuating of all the fisheries on the west coast, its dependence on the American markets being an additional element of uncertainty. The fishermen's earnings last year were only £1,924, as compared with £5,200 for the average of the past eight years.

Fisheries
General
Results.

(c.) The herring fishing at Downing's Bay, in North Donegal, produced last year £24,054, which was little below the average of the past eight years, viz., £26,300.

(d.) The summer herring fishing carried on at about 10 to 30 miles north of Sheephaven, County Donegal, and which was commenced by the Board's boats in 1901, has been most productive, and up to last year showed no unfavourable fluctuations. The estimated earnings were, in 1902, £5,358; in 1903, £10,000; in 1904, £11,000; in 1905, £12,700; in 1906, £24,000; and in 1907, £31,623. Last year this fishery extended westwards to the sea off Kincasslagh and Burtonport, but only £1,000 of the total receipts were thus accounted for.

1.—SPRING MACKEREL FISHERY.

In the spring of 1907 the Aran and Carna fishermen accepted the terms offered by a fish buyer, which were the same as those offered, but not accepted, in 1906, viz. :—

Aran Islands.

1st to 10th April,	20/-	per 126 mackerel,
11th to 30th April,	15/-	" " "
1st to 15th May,	8/-	" " "
16th to 31st May,	7/6	" " "
Month of June,	6/-	" " "

Owing to the prevalence of bad weather the fishing did not commence until the 15th April. Exceptionally bad weather continued with rare and short intervals all through the season, with the result that a very small fleet generally went to sea, and many of these boats fished with short trains owing to damage received during the early part of the season.

Towards the end of the season, after the contract for sale of fish had expired, several of the boats extended the period of their engagement; others did not do so and the buyers in the latter cases gave considerably lower prices than those contracted for, viz. : 5s. per 126 as against the contract price of 6s. 6d.

The Kilmurvey fishing was very poor with the exception of one large take, when a glut occurred and prices were very low: the rest of the season was particularly bad for small boats.

Altogether the Aran Islands showed a poor return for the season, only 3,302 boxes of fresh fish being sold, and 262 barrels cured, the payments to fishermen were no more than £885, and only 173 men and boys, the smallest number in any year since 1895, were engaged in the fishing.

The fishing began at Cleggan in the middle of April, and ended on 31st July. There were good prospects and plenty of fish, but until nearly the end of the season the weather was so inclement that the opportunities for fishing were very limited.

Spring
Mackerel
Fishery.

Five of the Board's share boats took part in this fishing, two of them with Cleggan crews, the other three with crews from Innisboffin. These boats took an average of £164 each. Besides about 18 small boats there were eight of the loan boats also fishing and took between £215 and £110 each.

The total amount paid to the fishermen for fish during the season was under £3,300 for about 8,600 boxes sold fresh and nearly 2,000 barrels cured. About £500 would represent the amount paid for local labour in curing. The prices varied from 14s. 2d. per 126 in April to 9s. 6d. in May, 8s. 2d. in June and 5s. 7d. in July, the largest takes being made during the last two months. Fifteen buyers attended at Cleggan, including a Norwegian Company which cured on board a schooner in the bay and also on shore on Cleggan Pier. The curing carried out by these Norwegians or under their orders was remarkable for the care with which the cleaning and sorting was done.

Cleggan Ice.

We supplied ice at Cleggan as in former years and the transaction again resulted in a loss to us, due partly to the excessive wastage from melting and partly to the late season, the takes being so small in the earlier part of the season that little ice was used until late. The hulk is a large one and the air space in the hold is far in excess of requirements. It has therefore been decided to divide the storage space by bulkheads next season in the hope of reducing the wastage. The cost of the ice, including all expenses of management, labour, hulk expenses, carriage, &c., amounted to £376 10s., and the sale of 2,982 baskets of crushed ice at 2s. 2d. per basket came to £319 10s. 4d. leaving a loss of just under £57. The fishing at Clifden began on 16th April in stormy weather and continued with frequent interruptions until the end of June. Only nine small boats fished and the results were almost nil, the few fish caught being sold locally for £12 or £13.

Clifden.

Doonloughan

At Doonloughan fishing was carried on between the same dates by 11 small boats and was very poor, the total earnings amounting to £50.

Bunown.

At Bunown, in addition to 10 small boats, one large boat took part in the fishing, and although much interfered with by the prevalence of bad weather, better results were obtained than at Clifden or Doonloughan, £300 being the earnings of the fishermen for about 650 boxes fresh fish and 100 barrels cured. The fishing in this district stopped before the fine weather commenced in July.

Roundstone.

Seventeen large boats fished from Roundstone from the 18th April to the 27th July, and three others fished for a few days.

In spite of the bad weather some of the boats made good earnings, the highest being £180, and the next £165, but the loss of nets was very serious, one boat losing the best part of three trains of nets. All Roundstone boats were under agreement with Messrs. Ruane and Sons at the same prices as in 1906. The quantities landed were just under 5,000 boxes of fresh fish, and 1,600 barrels cured, the earnings of the fishermen being £1,670, in addition to which about 300 was earned by local

curers, &c. The ice hulk *Unrestricted* was let by the Board to Messrs. Ruane, as in previous years, for the storage of their supply for the season Spring Mackerel Fishery.

On the 11th July, 1907, a heavy take of mackerel occurred at Roundstone, but owing to the failure of Messrs. Ruane's steamer to deliver barrels and salt in proper time the firm were unable to buy, and there was no market for the fish.

The local people then cured on their own account, and the buyers were unable, from want of labour, to cure even what they had bought. Every effort was made by the Board's officers to cope with this difficulty; but, owing to similar heavy catches at neighbouring stations buyers at other places were unable to take fish from Roundstone.

The Board provides supplies of salt and barrels at outlying stations to meet such emergencies, but it has been found that there is a disadvantage in keeping large supplies for sale at the principal centres, as buyers are then inclined to depend too much on the Board's stock and to neglect supplying themselves with sufficient materials for their own use.

Seven large boats, all issued by the Board under the loan system, and one small boat belonging to inhabitants of Achill Island decided to fish during the spring season from Darby's Point, although there was practically only one buyer there and no supply of ice; while at Cleggan, on the opposite side of the bay, the buyers were numerous, and the Board supplied ice as in former years. An application was made to have ice sent to Darby's Point, but this was quite impracticable. Darby's Point.

The fishing began on 18th April, but the weather was so unfavourable and the fishing so poor that on the 22nd May the buyer refused to take the fish and the boats had to go to Cleggan. Stormy weather continued almost without interruption till the end of June, and the fishing was most disappointing.

The amount of fish caught was not ascertained, but the money paid to the forty-two fishermen in the boats mentioned above was £253 and some £60 was earned by the people on shore.

Most of these crews gave up early to go to England for the harvest, as they do every year, even when fishing is good and promising well, and if the fishing season is late some of the crews break up before it closes.

Darby's Point boats should in future fish during the spring mackerel season from Cleggan instead of Achill.

In our last report attention was drawn to the difficulty of obtaining suitable crews to take boats under our revised share agreement system, and the failure to obtain a crew for a boat which had been specially set aside for the Connemara coast. The same difficulty was experienced several times in past seasons. South Connemara.

Another proof of the difficulty of developing the fishery in Connemara is afforded by the nobbie "Father Murtagh," which had been used for some time as an "instruction boat" with temporary crews in the hope of getting some of the younger men to adopt fishing as a temporary calling. The constant changes amongst the members of the crew and the unsatisfactory results

compelled us reluctantly to abandon this scheme and in the spring of the present year the boat was offered, with forty practically new nets, to a selected crew from one of the islands, but they refused unless we agreed to supply them with special nets, which in our opinion were unsuitable, and unless we made structural alterations in the boats, which were not considered advisable. The boat was accordingly transferred to another district.

2.—AUTUMN MACKEREL FISHERY.

- Cleggan.** The boats commenced fishing in August, but nothing was caught until towards the end of September. The fishing was continued until February, but was poor all through the season, being much interfered with by bad weather. Twenty-five small boats fished, large boats being unsuitable for working close to the shore, where the mackerel are found at this season. The result was 340 boxes of mackerel sold fresh, and 468 barrels cured, for which the fishermen received £650.
- Clifden, Bunown, and Doonloughan.** No fishing took place at Clifden. Twelve small boats fished at Doonloughan and 15 at Bunown. At the former place about 60 barrels were cured, realizing £1 per barrel, and at Bunown 200 barrels, worth about £200, were cured.
- Innisboffin.** The fishing at Innisboffin was not good, only 475 barrels being cured. The fleet consisted of 35 boats. Fishing began about the 1st October, and ended with the month of February, having been much interrupted, as at the other places, by bad weather.
- Kilronan.** Three large boats fished for a few nights, from Kilronan for mackerel during the herring fishing, but only caught a few hundred.
- Kilmurvey.** At Kilmurvey, 31 small boats and canoes fished from the last week in September till early in November but only went out one or two nights in the week as hardly any fish were found up to that date. The season was a very bad one throughout, and less than 350 barrels in all were cured, realizing for the fishermen £400 or about £8 7s. per man.
- Darby's Point.** The seven large Achill boats fished for mackerel and herrings in Clew Bay, from the 1st August to about the middle of November, and 410 boxes and 40 barrels were sold, realizing £290. The weather was rough and stormy, and the fishing was poor. Much damage was done to the nets by dog-fish which were in very large numbers.
- Leenane.** During part of the season there were no curers at Darby's Point and the fish, which were in small quantity, were sold to local buyers. Later on the boats removed to Killery Bay, the Board sending a supply of salt and barrels to Leenane for sale to buyers who wished to cure. The fishing lasted only a few days and the boats returned at the end of November to Darby's Point to lie up.

At Muingereena twelve canoes fished from November 10th to the end of the year, but owing to constant bad weather the returns were poor. A considerable quantity of the mackerel were sold locally and only a few were cured. North Mayo Stations.

At Porturlin three large and twenty-six small boats took part in the fishing during the months of August and part of September, when the season ended owing to the unfavourable weather. About 102 barrels were cured. At Belderrig fishing was carried on by the six local boats for the month of December and a few days in January, the bad weather which prevailed all through preventing anything like steady fishing. The take of the North Mayo stations did not bring in much over £300 to the fishermen during the autumn season, a result which was much below the usual average.

Nothing was done at Innisturk or Tully until very late. At the latter place the fishing opened on 9th November and closed on January 11th after a poor fishing. At the former it continued from 14th December to 4th February, and the total earnings at both places were under £100. Innisturk and Tully.

3.—SUMMER HERRING FISHERY.

Fishing began at Teelin on the 16th April, and continued till the end of June, during which period the weather was extremely unfavourable. Eleven large and 3 small boats fished, and only earned £100 for 50 boxes of fresh fish and 200 barrels cured. Teelin.

The season at Downings was a short one, only lasting from 7th May to the 8th June, and was light during that period. The Scotch fleet, including steam-drifters, was a large one, and with the local boats that fished made up a fleet of 280 boats; 11,440 barrels were cured, and the earnings of the fishermen were estimated at £30,912. Some 330 persons were employed in connection with curing, &c., their earnings amounting to about £1,800. Downings Bay.

The fishing commenced at Kincasslagh, on the 18th May, 16 large boats, including 5 steam drifters, fishing from that date to the 8th June. The value of fish landed is estimated at about £570. Kincasslagh.

Ten large, and about 200 small boats, fished at Burton Port, from 6th to 18th May, in bad weather, and with poor results, only about 20 crans being landed, value about £40. Burton Port.

COUNTY KERRY HERRING FISHERY.

In July, 1906, the Board sent herring nets from Clifden to Derrynane, County Kerry, having arranged to give instruction to the local crews for three weeks in herring fishing. Little herring fishing was done, however, as the mackerel kept the crews fully employed. The nets were left at Derrynane on the chance of an autumn fishing, but without result, and they were finally removed by the Board's steamer.

Kerry
Herring
Fishing.

A considerable number of herring nets were sold in the same year under loan at Kilmacalogue, but were largely used by the small boat fishermen for mackerel fishing.

In January, 1907, an experienced Instructor was sent to Derrynane to instruct the fishermen there in the mounting and preparing of herring nets, of which four fleets were issued under loan.

One of the Board's foreman coopers was then sent to Caherciveen, Dingle, and other places in Kerry, to Castletown Bere in County Cork, and through the neighbouring districts instructing the curers in the cleaning and curing of herrings; but owing to the small number of herrings caught little practical instruction could be given. We propose in 1908 to send a competent Instructor in herring curing to the southern coasts with a view to encouraging this fishery.

Kilmacalogue. Barrels and salt were stored by the Board at Kilmacalogue for the past two years to enable the fishermen there to cure their fish in the absence of buyers, as during the heavy autumn fishing at neighbouring stations there was considerable difficulty at times in getting a sale for the mackerel. Herrings generally appear in the bay after Christmas, and Messrs. Ruane, of Galway, received information towards the end of January, 1907, that large takes were being made at Kilmacalogue. They accordingly opened curing there and bought about 150,000 herrings at 20s. per thousand, using the Board's salt and barrels. The herring nets kept by the Board at this station were much in demand, but were employed for mackerel as well as herring.

Ballycrovane. There are several curing stations near Ballycrovane, but here, and at other places along Kenmare Bay, the catching of herring is so uncertain that buyers do not make preparation for them, confining their business altogether to mackerel. As the fishermen work chiefly close to shore and only get the herring when they come in close, the centre of Kenmare River is quite unfished. Large craft could not fish in the bay, owing to the danger of gales during the autumn and winter nights, none of the harbours being lighted. The fishing might, however, be developed by yawls carrying 6 or 8 nets of about 30 rows mesh.

Another reason for the absence of drift net fishing is that nearly all the fishermen belong to the crews of seine boats, and if four men went off to drift net fishing the remaining twelve men of the seine boat could not work, and the four men would consequently lose their places in the crew. Four or five yawls with an Instructor in each, and the lighting of one or two harbours temporarily during the season would, be necessary to give the herring fishing a trial, and we are making arrangements for this purpose.

West Cove.

The Board have improved the accommodation for curing at West Cove by covering some rocks near the pier with concrete.

4.—AUTUMN HERRING FISHERY.

Downing's
Bay.

The autumn herring season opened at Downing's Bay on the 4th September, but was very light for the first few weeks, when there was some improvement, but again in November and

December the takes were small, and the results up to the end of the year were very disappointing. A welcome and unexpected recovery occurred in January, and a heavy fishing continued up to the 25th, when it ceased and the boats were laid up. Seven thousand barrels were cured, and only a few boxes of herrings were sold fresh, the amount paid to the fishermen being £13,600. 93 large and 13 small boats fished in all, with crews numbering 640. The principal feature of this fishing was the sudden improvement at the end of the season, a month later than the close of the fishing last year. The Board's share boats alone earned £1,823 up to the end of November, and afterwards £3,483, almost entirely during January, making £5,306 in all.

Autumn
Herring
Fishing.

In December, 1907, one of the paid-up share boats, which had become the property of the crew, broke adrift from her moorings, and was lost. The boat, *St. Finan*, one of the Board's County Donegal fishing fleet, went ashore at Innishmeane on the 26th December, 1907, and became a total wreck. Most of her gear and all her nets were saved. The loss incurred by the Board through this wreck is included in the £24 mentioned later.

Wreck of
9 boats.

On the 27th and 28th January, 1908, during a severe gale from the N.W., a heavy sea in Downing's Bay swept a number of the boats from Trabeg Strand, where they had been beached, and from alongside the pier, with the result that seven were totally wrecked, two inside the pier on the beach and five in the bay, the latter being afterwards washed up on Tramore and Marble Hill strands. Several other boats were seriously injured, two of them being sunk alongside the pier, and one, after making two complete circuits round Trabeg Bay, was washed up on Tramore Strand. These three boats were repaired, as well as some others which were less injured.

One boat, which received no injury, got foul of some of the boats which were carried out by the tide and swamped in the bay, and was apparently held to them by her anchor chain. She rode out the gale in the open and was brought back to her moorings after the weather moderated.

As the gale began on Saturday night most of the boats' nets were on shore drying, so that the loss of gear was not so heavy as it would otherwise have been. A good deal of the gear which came ashore was, however, stolen, ropes and parts of the boats were removed, and general wrecking was carried on in spite of the efforts of the Royal Irish Constabulary and Coast-guards.

Of the boats totally wrecked none were new or very valuable, most of them having been fished for some years. They were all insured for two-thirds of their value under the Board's insurance scheme for a total of £416, leaving a loss to the Board, after allowing for salvage, of £24, which includes the value of nets lost in the boats. See Appendix XXI.

This is entirely a small boat station in the autumn, and 64 boats fished between 19th September and 4th January, when the fishing closed.

Magheraorty

A Motor
fishing boat.

A fishing boat, the "Ovoca," of Arklow, fitted with a petrol motor, and purchased by means of a loan of £900, issued by the Department of Agriculture, commenced herring fishing at Killybegs in February and met with more success than any other boat engaged in the fishing on that part of the coast.

Prospects were very good, and only for the constant succession of bad spells of heavy weather there might have been a successful fishing. As matters were, however, only about 82 barrels and 16 boxes of fresh herrings, and 1,100 barrels of cured fish were marketed, at prices varying from 18s. per cran at the beginning to 36s. at the end of season, the earnings being estimated at about £1,500 in all.

Kincasslagh.

At Kincasslagh the autumn fishing did not begin until the 22nd November, and during the course of the season, which closed on the 24th January, there were constant interruptions by bad weather. There were 25 large boats fishing, and 60 small boats. The number of barrels cured was under 1,000, and the fishermen received less than £1,300, while the local people earned about £120. These figures include the takes of three steam drifters which sold at Kincasslagh the fish caught in the neighbourhood of Downings Bay.

Burton Port.

Ten large and 120 small boats fished at Burton Port from 12th September till the 10th January, and taking into consideration the unfavourable weather the results were fairly good, over 400 boxes being sold fresh, and nearly 1,300 barrels cured. The fishermen's earnings amounted to £3,000, in addition to the earnings of curers and others on shore, which cannot be estimated with any certainty, owing to the curing stations being so scattered.

Magheragallon
and Bunbeg.

At Magheragallon and Bunbeg the fishing was late, beginning on 15th November and lasting till the 25th January, and was very poor, owing to the constant bad weather, which allowed of fishing being carried on during only sixteen days in all. The take was only 120 barrels and the earnings £170.

Rosbeg and
Loughros.

Two hundred and fifty boats, for the most part open row-boats, fished for a few days only at Rosbeg, and the takings for the season were 1,750 boxes sold fresh, and 2,150 barrels cured, for which the fishermen received £1,950, and shore workers another £400. The fishing was a comparative failure.

Killybegs

The fishing at Killybegs was well attended, there being thirty-one boats fishing, including several from Teelin and other places. The fishing began early in September, and continued until the end of November, as the weather was favourable during September and October, very fair results were obtained. The total quantity of fish landed was about 1,000 boxes fresh, and 2,900 half-barrels cured, and the earnings of the fishermen amounted to over £2,800, exclusive of the earnings of local people curing at the station. Nine buyers attended and prices were fair. There seems no reason why a considerable development should not take place in the fishing at this station, as it is close to the fishing grounds, and possesses a perfect harbour and a railway station, from which fresh fish can be forwarded promptly to the English and Scotch markets.

A very heavy loss was caused by the cutting away, in September last, of a large number of the drifters' nets, which are supposed to have endangered the nets anchored near the shore by small boats belonging to St. John's Point. The Board's fleet lost about fifty nets. The perpetrators were not discovered, as the night was dark, and though every effort was made, it was found impossible to obtain sufficient evidence to bring anyone to justice. It is difficult to prevent such occurrences where anchored nets and drift-net fishing are worked in the same waters. Similar damage occurred to the nets of two boats on 23rd and 24th September, and again it was not found possible to obtain sufficient evidence.

Autumn
Herring
Fishing.

At Kilronan the autumn herring fishing began in the first week of August and closed at the end of September.

Galway Bay

The bulk of the fish caught were marketed in Galway, as were those of the Connemara boats, and no statistics can be therefore given for any section of the fishing fleet. With the exception of a few good takes the fishing was poor, and the earnings may be fairly estimated as not exceeding £140 for twenty-one large boats. Some of these boats only fished for a very short time owing to bad weather. The number of barrels of herrings cured at Kilronan was forty-one.

The nine small boats at Clare Island fished for little more than a fortnight in the end of September and beginning of October. In spite of very good prospects the fishing turned out badly owing to the severity of the weather. The fishermen had postponed the commencement of the fishing until too late, and most probably lost a heavy take by this delay.

Clare Island.

The returns show only some 300 barrels of herrings, valued under £250, cured on the island.

At Darby's Point there was a mixed herring and mackerel fishing, which is recorded under the latter heading.

Darby's
Point.

WINTER AND LONG LINE FISHING.

The long line fishing at South Aran began on the 18th December, 1907, and stopped on the 17th April, 1908. The weather throughout was very broken and unsettled, and the fishing was poor.

South Aran.
(Innishere).

In all 21 small open boats fished, and nearly 1,100 boxes were sold fresh, only 12 barrels being cured. The amount paid to fishermen was under £490, and the local workers ashore earned another £40.

There was practically no long line fishing last winter, and the earnings were chiefly made out of mackerel, the autumn mackerel fishing having lasted well into the new year.

North Mayo
Station.

There was no long line fishing this season at Teelin.

Teelin.

SOUTH ARAN YAWLS.

Owing to the landing-place being very exposed, the Greencastle yawls, which have been worked on the share system in South Aran from 1899 onwards, have not been found so suitable for fishing

South Aran
Yawls.

from this island as the large six and eight-oared canvas canoes built by the islanders, and we have recently transferred these boats to Kilronan. There is very little shelter on the north-east of the island, and sudden squalls being frequent, the fishermen require boats which they can easily haul up beyond the reach of the sea. The native "curragh" fulfils this requirement.

Although this experiment has cost us about £145, it was far from being a complete failure, as the total earnings of twelve boats amounted to upwards of £1,200, and the fishermen learnt to keep their boats' gear and nets in excellent order; in fact, at none of our fishing stations have nets and gear been kept in better condition, and during the eight years in which the share yawl system has been in operation at South Aran, the nets and gear have been used in canoes when the yawls were unsuitable.

INSTRUCTION IN FISHING.

Co. Donegal.

The number of Instructors employed during the summer herring fishing in the County Donegal was thirty-two in all. The period during which they were employed as Instructors in charge of boats was about five weeks, exclusive of the time during which thirteen of them were employed in net mounting, when their wages were not charged against instruction.

During the autumn season, which lasted at different places for varying periods, from fourteen to twenty weeks, thirty-four Instructors were employed.

Western
Counties.

In Mayo and Galway twenty Instructors were employed, two in share boats and ten in loan boats for a period of between eighteen and twelve weeks, according to their stations.

During autumn twelve men were employed for from ten to twelve weeks entirely in loan boats. One Instructor was employed for nine weeks in County Kerry.

The total cost of instruction during the year was £2,896 4s. 4d., of which only £488 13s. 5d. was repaid, owing to the poor returns from the fishing during spring, summer, and autumn fishing.

Hitherto the Instructors in County Donegal have all been recruited from Scotch ports, while those in the western counties have been drawn from the south and south-east coasts of Ireland. It is proposed in future, for various reasons, to distribute the Scotch and Irish Instructors, both in the north and west.

NET MOUNTING.

Downings.

Hitherto the nets, which are purchased for the herring fishing in Donegal in the white state, and are mounted, cutched, and prepared at Downings Bay, have been so treated by experienced Instructors, specially engaged early in the season, and a price has been fixed for the sale of the nets to cover the cost of their work, as well as that of all materials. During the spring of 1907-8 a certain number of local fishermen were instructed in this work, and we hope to get it done entirely by local labour, although it will probably be a considerable time before instruction can be quite dispensed with.

BOAT BUILDING.

Four excellent Zulu boats were designed and built at the Killybegs Industrial School. The building yard there is much improved, the Board having made last year a grant of £300 for the erection of a large shed, so that building can now be carried on under shelter all the year round. All the boats built during the past year at Killybegs were 36 feet on the keel. Their price was £160 each, exclusive of outfit. Boat building.

Four Zulu boats, two of 36 feet keel and two of 37 feet keel, were built for the Board by Messrs. W. and G. Stephens, of Banff, and were to be ready for the summer fishing of 1908. Another was ordered from the Wexford Shipbuilding Company, making nine newly built boats available for distribution in place of wrecked boats. This year, owing to lack of funds, our orders for new boats were very much reduced, and a large number of applications from new crews had to be refused or postponed.

For some years past the establishment of a boat building and repairing yard at Fanny Bay, in Mulroy Bay, where the Downings boats lie up for the winter, has been under consideration. A site has now been obtained, and it is proposed to erect a store and repairing shed, and to prepare a building yard.

Applications having been received from several crews of Board's boats and other fishermen in congested districts, we ordered after careful enquiry an up-to-date steam drifter from Messrs. Mackie and Thomson of Glasgow in June last, and entered into an arrangement with a crew to take the boat and fish with her on the Irish, Scotch, and English coasts, under a modified form of our share system agreement, which made provision for coal, running expenses, wages of skipper, engineer and fireman, &c., &c., setting aside one-fifth of the earnings for the crew's share, the balance to go towards the repayment of the boat and gear. When the building of the vessel was considerably advanced, and after what appeared to be a satisfactory arrangement had been arrived at with the crew, they finally declined our terms, and although every effort was made to conclude an agreement with other applicants, it was found impossible to do so, the people being apparently averse to leaving home for such long periods as would be necessary in following the fish to the English and Scotch coasts. We were consequently compelled, though with great reluctance, to sell the boat on the stocks at a loss of £275, and abandon the scheme. Steam Drifter.

BARREL-MAKING.

In consequence of the poor fishing during the previous season in Cork and Kerry there was a small sale for barrels, and a large stock was left on the coopers' hands. This led to a reduced demand for staves, headings, and hoops, and we imported only two cargoes from Scotland by the SS. *Granuaile*, chiefly for

Barrel
making.

sale to coopers in the southern congested districts. The first cargo arrived in June, 1907, the second in February, 1908, and the total quantities brought were—

Whole barrel staves,	.	.	266,500 ft.
Whole barrel headings,	.	.	70,725 ft.
Iron hoops,	.	.	31½ tons.

Of these quantities 20,000 ft. staves and 3,180 ft. headings were sold in Galway; 10,000 ft. staves, 2,000 feet headings, and 1 ton iron hoops went to Burtonport, and the remainder went to supply Cork and Kerry coopers.

These materials were sold to twenty coopers at an average cost of £4 19s. 8d. per 1,000 feet of staves, £5 7s. 2d. per 1,000 feet of heading, and £9 7s. 8d. per ton of iron hoops.

To meet these purchases we issued loans amounting to £1,450 0s. 2d. and received £581 5s. 8d. in cash, but owing to the poor mackerel season in 1907 some of the coopers found it difficult to meet their liability for previous loans, and we had to considerably extend the time for repayment.

FISHERY LOANS.

The capital of Fishery Loans transferred to us by the Board of Works in 1893 amounted to £36,685, including all instalments of interest and principal then unpaid, but excluding the £50,000 which we applied to other purposes in 1893 and the following years. Of the total of £36,685 we have since collected £31,304 and have written off as irrecoverable £4,738, leaving a balance of £643 to be collected. The loans made by us since 1893 amounted to £92,544. (See Appendix VII.)

Since our work commenced, in 1892, 128 loans for large boats, including some cases transferred to us in 1893 from the Commissioners of Public Works, have been paid off by the owners.

Loans amounting to £6,916 were made in the year for fishing boats and gear, and twenty large boats purchased by this means brought up the total number of loan boats to 111. The entire fleet of large fishing boats now on the Board's books, including both loan and share-boats, numbers 175.

We have referred in several of our recent reports to the want of success which has attended our efforts to develop the fisheries on the southern coast of Connemara, due in great measure to the reduced earnings from the mackerel fishery and the absence of a remunerative herring fishing. Owing partly to these circumstances many of the loans made for the purchase of large fishing-boats and the necessary nets and gear have not been satisfactorily re-paid, and we have had from time to time to write off as irrecoverable sums amounting in all to £2,770 due in this district. Last year we took up from the borrowers nineteen large boats

and cancelled the balances of the loans, amounting to £2,047, due upon them. This step was taken to prevent the further deterioration of the boats and in order to utilise them in other districts. Particulars of these cases are as follows:—

Name of Boat.	Total of Loans made.	Date of the First Loan.	District in which Owner Resided.	Amount written off.
	£ s. d.			£ s. d.
"Father O'Donoghue,"	241 11 0	14 April, 1904.	Kilronan.	128 19 8

III.—INDUSTRIES.

LACE AND CROCHET.

Up to the end of December, 1907, the demand for lace and crochet was well maintained, and workers were kept fully employed. During the last three months of the financial year, however, in sympathy with a general depression in trade, accentuated by the American financial crisis, sales have been difficult, and the lace trade, like other businesses, has temporarily suffered. Notwithstanding this set back the amount paid to workers during the year, viz., £25,300, was considerably larger than in any previous year, and it might have been much more had the workers, when trade was at its best, been more punctual and more regular in attendance at the classes.

As pointed out in previous reports, considerable difficulty is experienced in inducing lace workers to give up old patterns for new ones and in getting them to respond to the requirements of the market for fresh patterns in fine work. A greater readiness to meet the requirements of buyers is essential if the workers in this country are to compete successfully with foreign workers, who show great quickness in following changes in the public taste.

HOMESPUNS.

Homespuns.

All the homespun webs coming to market at Ardara and Carriek, Co. Donegal, were measured at the Board's depots at these places. The number of webs thus measured was 2,821, which is practically the same as last year. The sales have been fairly well maintained at the local fairs.

In November last we published a "Handbook on Dyeing" for the use of woollen homespun workers, written by Mr. R. P. Milroy, under the superintendence of our Inspector, Mr. Walker. This book fully describes in a simple and practical manner every process in connection with the dyeing of wool by the vegetable and other dyes commonly used by homespun workers. The object is to give dyeing recipes, in which simple weights and measures are used, and the usual rule of thumb methods are reduced to accurate measurements of the quantities of materials required to produce various effects. Homespun dyers are thus enabled to produce greater uniformity in shade and at the same time a greater variety in colour. The majority of these vegetable dyeing recipes have never previously been published, and this is probably the first attempt that has been made to describe in a simple manner how the various shades may be produced from such vegetable dyes as crota, water-lily root, bracken, heather, iris, sloe, &c., &c., in conjunction with the use of a suitable mordant. The handbook may be obtained at our office, price eight pence.

Weaving instruction has been given during the year at Ardara and the surrounding districts, County Donegal, and at Achill Island, County Mayo.

DOMESTIC TRAINING CLASSES.

Domestic
Training
Classes.

Under the Board's scheme of instruction in Cookery, Laundry, and Domestic Economy, six certificated teachers have been employed during the year, who have given a four months' course of instruction at eighteen centres, at which two classes have been held each week-day, one class in the forenoon and one in the afternoon, at each of which an average of about twenty pupils attended. Those pupils who live furthest from the class-room usually attend in the forenoon, and those who live near as well as the elder school-children, usually come to the afternoon class.

The Board have also paid the fees to enable a number of girls living in the surrounding congested districts to take a six months' course of residential training in Domestic Economy and Housewifery at the Killarney School of Domestic Economy. These courses of instruction have been found to be most serviceable, and the pupils who are willing to take domestic service have all been placed in good situations in this country direct from the school. Very good reports have been received as to the value of the training.

Full courses of instruction in Domestic Economy have been given at the following centres, viz:—Malinbeg, Dunaff, Cloghan,

Carndonagh, Culdaff, and Derrybeg, County Donegal; Clonbur and Cornamona, County Galway; Louisburgh, Partry and Carnacon, County Mayo; Kilmactigue, County Sligo; Drinoleague, Inshigeela and Ballingeary, County Cork; Caherdaniel, Sneen and Newtownsandes, County Kerry.

MANUAL INSTRUCTION CLASSES.

Manual Instruction Classes have been held during the year at Culdaff and Carrigart, County Donegal; Cashel, County Galway; Ballycroy, Keenagh, Geesala, and Aughamore, County Mayo; Cloonacool, County Sligo; Ratravane and Rosebrin, County Cork; and Glencar, County Kerry.

The majority of these classes have been very well attended, and the pupils have freely availed themselves of the opportunity of purchasing on the favourable terms offered by the Board sets of carpenter's tools, which are very useful to them in their own homes.

MACHINE KNITTING INSTRUCTION.

Courses of instruction for learners have been given in machine knitting at Pollaid, Middletown, Straleel, Knockletragh, Meenbaud, Dungloe, and Bunbeg, County Donegal; and at Ballyvourney, County Cork.

Where the usual security required is given for the repayment of a loan workers are supplied with knitting machines at wholesale price, in districts where any firm or agent undertakes to supply work.

LIST OF LACE AND CROCHET CLASSES.

Lace and Crochet Classes during the year 1907-8 have been in operation at the following centres:—Ardara, Aranmore Island, Bruckless, Loughmolt, Carrigart, Dungloe, Fanad, Fintown, Glenvar, Massinass, and Culdaff, County Donegal; Carna, Clonbur, Costelloe, Killeaney, Leenane, Oughterard, Roscahill, Rossmuck, Roundstone, Spiddal and Cornamona, County Galway; Achill Sound, Ballina, Attymass, Dereen, Bangor Erris, Ballycroy, Belmullet, Carratigue, Corclough, Shanahee, Derdneftderg, Derrypark, Dooehoma, Foxpoint, Glenamoy, Killogearry, Kiltimagh, Letterbrick, Porturlin, Pullathomas, Shrah, Tourmakeady, and Clare Island, County Mayo; Benada, Cliffoney, Ballintrillick, Kilmactigue, and Magherow, County Sligo; Killarga and Rossinver, County Leitrim; Baltimore, Sherkin Island, Castletownbere, Durrus, Glengariffe, Kilcrobane, Schull, Ballydehob, Bere Island and Cape Clear Island, County Cork; Glenbeigh, Shanacuan and Caherdaniel, County Kerry.

EMBROIDERY AND DRAWN WORK CLASSES.

Classes have been in operation at Ardara, Gartan, and Knockletragh, County Donegal; Deirew, Partry, Treenlaur and Shrah, County Mayo.

LACE CURTAIN CLASSES.

Classes have been in operation at Carraroe, Lettermore, Lettermullen, and Kilkerrin, County Galway.

IV.—ENGINEERING WORKS AND PARISH COMMITTEES.

Our chief expenditure on engineering works is made in connection with the improvement of the estates purchased under the Land Acts, and statistics of these works are given in Appendix No. . The works referred to below are not connected with our estates, but arise out of applications made to us or to the County and Districts Councils by persons resident in the various localities. These works are carried out in some cases by the engineering staff employed jointly by the Department of Agriculture and ourselves; in other cases by County Surveyors, with a contribution from us towards the cost.

The net expenditure during the past year amounted to £6,217 divided as follows :—

Marine Works, Piers, Slips, &c.,	£	5,662
Roads, Bridges, Drainage Works, &c., carried out by the Board,		305
Roads, Bridges, &c., carried out by County Authorities, aided by contributions from the Board amounting to		251
Total,	£6,217	

The details of this expenditure will be found in Appendix No. XXII.

The principal works completed in the year were Adrigole and Glengarriffe piers, Co. Cork, boat-slips at Ballyetherland and Whiteport, in Co. Donegal, a landing place at Ballyglass, Co. Mayo, and a boatslip at Dursey Island, Co. Kerry, which was recently purchased by the Board for re-sale to the tenants.

Glengarriff
Pier.

The new pier at Glengarriff has been completed at a cost of £1,126, but the want of a sufficient depth of water at low tide prevents the regular calls of the Bantry Bay steamers which were intended to be made when the work was decided upon. We have now succeeded in obtaining the use of a dredger and hope soon to improve the approach to the pier.

PARISH COMMITTEES.

Parish
Committees.

The Parish Committee Scheme, for the encouragement of small landholders in improving their dwellings and farms, was commenced in 1897 by grants, amounting in all to £1,520, to twelve parishes in the most densely populated portion of the Congested Districts, viz., East Mayo. The objects of the scheme were so well attained that we have gradually extended its

operations to one hundred and five parishes in Connaught, Parish Committees thirty-four in County Donegal, and twenty-nine in Cork and Kerry, as shown by the list of parishes in Appendix No. XXIV. The amounts voted in the past year were £7,039 for Connaught £1,950 for Donegal, and £2,374 for Cork and Kerry.

Under the conditions of the scheme the value of the work done by the landholders to whom the small grants, generally from £1 to £3, are made, is greatly in excess of the payments made by us. Excluding County Donegal, the works done last year were valued at £31,234, while our grants approved were only £7,287. The nature of the works carried out was as follows:—

- (a) Erection of new dwelling-houses, or the improvement of existing dwellings. 204 new dwelling-houses were erected, the estimated cost being £5,046, in respect of which grants to the extent of £1,026 were made. Improvements were made in 1,521 existing dwelling-houses at an estimated cost of £10,579, towards which grants to the extent of £2,703 were made.
- (b) In 1,001 cases the erection of new out-offices was undertaken, the estimated value of the works being £10,493, and the grants sanctioned were £2,453; whilst in 368 cases improvements were made in existing buildings at an estimated cost of £2,747, for which grants amounting to £689 were sanctioned. It is the primary duty of the Parish Committees to cause the cattle to be removed from the dwellings of the people, and although considerable progress has been made in this direction, much remains to be done.
- (c) Drainage and Fencing.—100 works, estimated to cost £754, in respect of which grants amounting to £138 were sanctioned.
- (d) 99 works, comprising the making of new and the repair of existing roads, were approved, the grants in the aggregate amounting to £229, and work to the estimated value of £1,332 was undertaken.
- (e) Reclamation of waste land and other unclassified works, to the number of 33, were undertaken, the grants amounting to £49, and the value of the work to £281.

The additional parishes included in the scheme last year were in the counties of Mayo (1), Galway (3), Roscommon (1), Cork (2), Kerry (4), Sligo (1), and the manner in which the business was conducted in the new parishes is encouraging, for it leads us to believe that the scheme will be carried out in a thorough manner when it is fully understood. In two of the 134 parishes in Connaught and Munster no committees were formed in time to carry out works last year, and in a third case difficulties relative to the appointment of a supervisor arose, which were not adjusted in time to allow of any works being undertaken.

Parish Com-
mittees.

In regard to County Donegal the figures for each class of work are as shown in Tabular Statement beneath:—

Nature of Works.	Number.	Estimated Cost.			Grants sanctioned or Prizes Awarded.		
		£	s.	d.	£	s.	d.

V.—MISCELLANEOUS.

Membership of
Board.

In March last the Right Hon. Arthur James Balfour communicated to us through the Chief Secretary his desire to resign his membership of our Board, at whose meetings he stated he had been able to attend very rarely. We requested Mr. Birrell to convey to Mr. Balfour our appreciation of his valuable services to our Board, even after his connection with Ireland had ceased, and to say that we would be greatly pleased if he could see his way to continue his membership. It was with very deep regret that we subsequently learned from Mr. Birrell that Mr. Balfour adhered to the wish he had expressed.

It will be remembered that Mr Balfour was the Minister who introduced the Bill into Parliament for the creation and endowment of the Board, and that he was its first chairman.

Local Agri-
cultural Shows.

In the Appendix will be found a list of grants made in the past year in aid of the prize lists at agricultural shows held at places in or near the congested districts. Owing to the state of our funds, we had to give notice that no such grants could be paid in the following (current) year.

Lady Dudley's
Nursing Fund.

Under the arrangement made with the Committee of Lady Dudley's Nursing Fund, by which interest on the cost is paid in lieu of rent, eight houses have been built for nurses in the congested districts, viz., at Aranmore Island and Anagry, Co. Donegal; Achill and Geesala, Co. Mayo; Spiddal, Co. Galway; Glengarriff, Co. Cork; Dooks and Westcove, Co. Kerry. Two others, at Bealadangan, Co. Galway, and Derrybeg, Co. Donegal, have been decided upon, and at Pullathomas, Co. Mayo, a house is rented from us by the Committee. Our offer to contribute towards the maintenance of a nurse at Tory Island, mentioned in our last Report, has not yet been accepted.

S.S.
Granuaile.

Our steamer, the *Granuaile*, brought two cargoes of barrel-making materials from Scotland and delivered them on the west coast. In addition to the vessel's usual work in connection with fisheries, estates, and engineering works, she conveyed 150 tons of seed potatoes from Belfast and Derry to "Relief Committees" temporarily constituted under section 3 of the Unemployed Workmen Act, 1905, at Rossmuck, Carraroe, Kilkerrin, and Spiddal.

The subsidy of £700 a year to the Galway Steamboat Company for the tri-weekly service to the Aran Islands, and a subsidy of £200 a year to the Bantry Bay Steamboat Company for improved service in Bantry Bay, were paid during the past year. Calls are made at the new pier at Glengariff as regularly as tide permits, and much use is made of it by other vessels landing foodstuffs, &c.

Steamer
Subsidies.

On the 4th February last a deputation from our Board, consisting of Sir Antony MacDonnell, the Earl of Shaftesbury, the Rev. Denis O'Hara, and Mr. Henry Doran, waited on the Chancellor of the Exchequer, at the House of Commons, to inform him that the Board's funds for the improvement of estates were exhausted, and also that, in the Board's opinion, tenanted estates for the purchase of which the Board had been negotiating should be bought by them without delay if additional funds could be obtained. The deputation were informed that until the report of the Royal Commission had been issued the question of increasing the Board's funds could not be considered.

Deputation to
Chancellor of
Exchequer.

The capital of £6,000 fixed in 1904 as the maximum we were then prepared to lend to Raiffeisen banks was not increased during the past year. On the 31st March last £5,855 of this capital was lent to sixty-three banks. The total amount of capital obtained from other sources by forty-five banks working in the congested districts was £8,643, as appears from the statistical report given in the Appendix, No. XXIII. The total reserve funds of these banks now amount to £989, an increase of £140 since the previous year.

Raiffeisen
Banks

For various reasons, the co-operative credit movement is particularly valuable in the congested districts. The "gombeen" money-lender does not now occupy as commanding a position in backward districts as formerly, but it is to be feared that, with a change of rôle, the same part is still played in the tragedy of congestion. The long credit and tied trade of the shop dealings are only a variant on the older system. Whatever the form of demoralising credit, it naturally exercises greater sway in backward districts and amongst people whose poverty tempts them to borrow even under the most disastrous conditions, than in places where the joint stock banks are more easily accessible as lending agencies. It is found, too, that for the class of small farming adopted in congested districts the system of small loans for short periods is both suitable and lucrative, relatively larger profits being made from investments in stock, seeds, manures, &c., by people who farm on the scale, and in the ways adopted in the West than by larger farmers. Not only, therefore, is the need of cheap credit most urgent where the farmer has to work on the very smallest capital, or perhaps with none at all, but the profits from economic loans, such as these banks provide for their members, are most rapidly realised and most keenly appreciated. In no other way can the load of debt under which so many of the congested live be removed without injury to their character than by a gradual substitution of economic credit on the co-operative plan for the thriftless and ruinous credit system.

The problem of congestion is at least as much a human problem, a problem, that is, of the character and intelligence of the human units, as an economic problem in the abstract sense, and

Raffaissen
Banks.

co-operative credit is one of the best remedial agencies at work from this point of view. Possibly it is the very best. But it should always be remembered that the very circumstances which make a revolution in the finance of congests so urgent, at the same time make progress towards its accomplishment difficult and slow.

Telegraph
Extensions.

In the past year we undertook guarantees to the General Post Office for the extension of the telegraph system to Lavagh, County Leitrim; Kilkerrin and Lettermullen, County Galway; Bellacorrie and Clare Island, in the County Mayo, bringing our total liability for such guarantees up to £870 per annum, but we were only called upon to pay £131 in the year for making good deficiencies in telegraph receipts.

Kelp Burning

The price obtained on the west coast for burnt kelp was not so good as formerly, as it varied from £3 15s. to as little as £1. Taking £2 15s. as the average price, the receipts per family in County Galway were from about £6 15s. to £11. Out of a total of seventy-seven families occupying Clare Island, twenty-four engaged in this industry and sold their kelp at £3 5s. to £3 10s. per ton. On the Aran Islands about 300 tons were prepared and sold at an average of £3 5s. per ton.

Assistance
from Police
and Coast
Guards.

We have been, as in many previous years, under great obligations to the Inspector-General of the Royal Irish Constabulary and to the officers and members of the Force, and also to the officers and men of the Coast Guard Service, for very valuable assistance given in connection with fishery and other operations.

Annual
Accounts

The accounts of receipts and payments in the year ending 31st March last, as furnished to the Comptroller and Auditor-General, with full details under each head, and statements of the loans issued, are submitted in the Appendix of this Report.

We have the honour to be

APPENDIX XXVI.

ORDER IN COUNCIL.

By the Lords Justices and Privy Council in Ireland.

*S. Walker, C.
Hemphill.*

Whereas by Section 3 of the Congested Districts Board (Ireland) Act, 1901 (hereinafter called the Act of 1901), it is enacted that where the Congested Districts Board (hereinafter called the Board) have, whether before or after the passing of the Act of 1901, purchased land elsewhere than in a Congested Districts County, We may, if We think fit, on the report of the Board, by Order in Council declare that, for the purposes of the section in recital, the land shall be treated as part of such Congested Districts County as We may determine, and the Board shall thereupon have with respect to that land all the powers conferred on them by the Congested Districts Board (Ireland) Acts as amended by the Act of 1901. And whereas the Board, after the passing of the Act of 1901, purchased the lands the particulars of which are set out in the Schedule to this Order, which lands are not situate in any Congested Districts County. And whereas the Board by letter dated the 15th day of August, 1907, under the hand of Frederick W. D. Mitchell, their Secretary, reported that they had purchased the said lands, and requested that We might be pleased to declare by Order in Council that under the provisions of Section 3 of the Act of 1901 the said lands should be scheduled as congested districts and treated as part of the Congested Districts Counties for the benefit of which they were purchased. And whereas the names of the respective Congested Districts Counties for the benefit of which such lands were respectively purchased are set opposite the names of such lands respectively in the Schedule to this Order. And whereas We have determined that such lands respectively shall, for the purposes of Section 3 of the Act of 1901, be treated as part of the respective Congested Districts Counties the names of which are in the same Schedule set opposite the names of such lands respectively. And We think fit to make the following Order:—

Now We, the Lords Justices-General and General Governors of Ireland, by and with the advice of His Majesty's Privy Council in Ireland, in pursuance and exercise of the powers vested in Us by the Act of 1901, and of every other power enabling Us in this behalf, do hereby order and declare as follows, that is to say:

(1.) For the purposes of Section 3 of the Act of 1901 the lands, the particulars of which are specified in the Schedule to this Order, shall respectively be treated as part of the respective Congested Districts Counties, the respective names of which are in the said Schedule set opposite the names of the said lands respectively.

(2.) This Order may be cited as The Congested Districts Board (Ireland) (Outside Lands) Order, 1907.

Given at the Council Chamber, Dublin Castle, the 10th day of October, 1907.

*W. M. Johnson.
D. Harrel.
W. Kenny.

Under the Land Act, 1903, the advances made by the Land Commission for the purchase of Estates by this Board do not pass through the Board's hands, being distributed by the Land Commission. The expenditure in column 11 is brought up to 31st March, 1908, but in most cases the works have not been completed. Expenses of administration are not included.

† Includes £11,000 for purchase of arrears of rent.
